Course Overview:

 This course provides fundamental insight into the logistics support analysis (LSA) process. It focuses on the primary current standards that serve as the basis for many LSA programs - GEIA-STD-0007, MIL-STD-1388-2B, and LMI. Additionally, it examines the role of the analysis in PBL and spiral programs. The focus of the course is to provide you the necessary insight to produce the appropriate support system for your program. Supportability Analysis (MIL-STD-1388-2B, LMI, GEIA-STD-0007) course provides the foundation for the use of SLICwave(r) software.
